

Supplemental Table 2: Correlations That Significantly Changed Between the Pearson and Partial Models

Variables	Difference	t-statistic	p-value
Net Worth: Income*	0.23	4.774	< .001
Risk Tolerance: Extraversion	0.18	3.696	< .001
Net Worth: Openness*	0.16	3.274	0.001
Risk Tolerance: Agreeableness	0.15	3.065	0.002
Risk Tolerance: Literacy*	0.10	2.030	0.043

Note: Correlations indicated with an astrisk (*) became nonsignificant at the .05 level with the inclusion of covariates (age, gender, and education).
