## Table A2 Sustainability Test—All Countries

This table shows, for stock-bond (S-B) allocations between 80-20 and 20-80 and for initial withdrawal rates (IWR) between 3% and 5% with subsequent withdrawals adjusted by inflation, the failure rate (F), the unsustainability rate (U), the average year during the retirement period in which a strategy became unsustainable (Y), and the proportion of times the sustainability test led to a decrease in the sustainable withdrawal of at least 10% (D10) and at least 20% (D20). All figures are in percentage except for Y (years).
